WINFIELD HOMES

Winfield Homes is proud to introduce The Cedar Creek, showcasing the ultimate in green building practices, durable/sustainable materials, renewable technologies and fresh ideas for today's lifestyles.

Set deep in the pine plantation, privacy and wonder await you in this efficient and economical split bedroom ranch home: 1,785 sq. ft. with 3 bedrooms and 2 ½ baths.

Upon entering and passing the perfectly-placed study, your attention is drawn to the soaring ceilings, built-in bookshelves and entertainment center in the great room. Large windows and French door lead you to the deck overlooking the woods, made entirely from sustainable and recycled wood and plastic composite boards.

The roomy kitchen features lovely Maple cabinets, a walk-in pantry, an eating island, and is open to the great room and dining area. The laundry room, mudroom with lockers, and powder room are all located conveniently between the kitchen and the 3-car garage (which also has a zero threshold entry and separate stairway to the lower level).

The Master Suite features large windows to the back yard, a tray ceiling, his and hers walk-in closets, and a Master Bath, which includes a private shower and toilet area, and opens directly to the laundry room for the ultimate convenience of getting laundry to your closet quickly.

This home included an optional finished exposed lower level, and is part of the fine collection of economical homes you can build with Winfield Homes. We build better homes at better savings...better hurry!

• 1,785 SQUARE FEET • 3 BEDROOMS • 2.5 BATHROOMS
